

## European Technology Development Ltd

---

Job Opportunities: METALLURGISTS, MECHANICAL ENGINEERS, POWER OR PETROCHEMICAL PLANT ENGINEERS

Located in Surrey (40 minutes train journey from central London) we are a small and friendly company with big ambitions and clients in all corners of the world. We provide consulting services to power plant and petrochemical/ refining industry in Europe, USA, Canada, Japan, Australia, South Asia, South East Asia, Middle East and elsewhere. We also conduct technology development and R&D projects, many in collaboration with world leading researchers and industry. This gives us an excellent opportunity to offer unique technical support to industry which is second to none.

Work for the present positions will be mainly based in the UK and some projects may involve travel for a few days to Europe and other countries. The engineers recruited may have to conduct review studies or carry out in-depth investigation into a specific industry problem, work on an R&D project, conduct failure analysis, develop new and innovative procedures or products for clients, formulate or support the formulation of technical guidelines, or provide consulting services (depending on his/ her level of experience and interest) in plant integrity or life assessment. We also conduct training courses and seminars both in London and overseas and some of the staff can be partly involved in teaching these courses.

Interested candidates may like to go through the ETD web site [www.etd1.co.uk](http://www.etd1.co.uk) to see the type of consulting services or technical projects usually undertaken.

These positions require *self-motivated* and *hard working* candidates who are ambitious, enjoy developing new ideas, would like to innovate and who like working as a part of a team.

*To informally discuss as to what you may have to offer, please phone:*
