

New Job Opportunity: Plant Services Team Leader

Located in the heart of Surrey, about 40 minutes train journey from central London, we are a small and friendly company with big ambitions and expansion plans. Thanks to the efforts of our enthusiastic and dedicated staff we are well known to industry the world over. We provide consulting services to power and petrochemical/ refining/ chemical/ fertiliser and other such plants, and to oil and gas industry in general, for the clients in Europe, USA, Canada, Japan, Australia, South Asia, South East Asia and elsewhere. Our technology development and R&D projects in collaboration with international industry in Japan, North America, Europe and elsewhere means that we can offer latest and state-of-the-art products and services to our clients that are often the envy of our competitors.

We provide services in plant integrity, stress analysis, crack assessment, risk based management/ maintenance and inspection, fitness-for-service, probabilistic assessment and a host of other related areas including plant cost analysis, efficiency improvement, human resource development and training etc. In addition, we offer services in plant life assessment/ extension, on-site replication, hardness testing and advice in component repair and replacement.

Due to our expanding services and continued requests from clients for new or repeat work, we are now looking for an experienced Plant Services Team Leader to lead a team of enthusiastic and hard working engineers. The work will involve leading the task of preparing proposals, liaising with international clients, understanding their industrial problems and offering off- or on-site plant integrity and life assessment services. The company has a very large data and knowledge base, in-house software tools and state-of-the-art on-site testing tools and equipment. In addition to the expertise of its own staff, ETD has access to its dedicated consultants and specialists in Europe, Japan and North America to call upon as and when required.

The Plant Service Team Leader will be someone with an established expertise in the integrity and life assessment of some or many of the following sectors: power plant boilers, turbines, petrochemical, refining and other such plants. Interested candidates may like to go through ETD's website www.etc1.co.uk to see the type of consulting and plant services that we offer or the technical projects usually undertaken.

ETD's plant services work is very challenging and exciting in that, unlike our rivals, we use new and innovative tools and methodologies where required. The rewards offered to our employees are very competitive. The work is in a friendly and efficient environment.

Please note that this position requires *self-motivated* and *hard working* candidates with a good command of English language. The successful candidate will be someone who is ambitious, likes innovative thinking and likes working as a part of a team.

To informally discuss as to what you may have to offer, please phone:
